SwitchView®

PC/Multimedia/DVI KVM Switches

ADVANTAGES

- Convenient integrated USB hub lets you share printers, scanners, digital cameras, PDAs and other USB peripherals between multiple computers
- Controls up to four attached computers from a single keyboard, monitor and mouse
- Color-coded cables and connectors provide quick installation
- Supports switching through front-panel buttons or through keyboard hotkey sequence
- LEDs indicate active device
- Audio support for speakers and microphone
- Compact design saves desktop space
- Auto scanning between computers
- Easily add computers without powering down the KVM switch or attached computers
- Error free boot up with keyboard and mouse emulation
- SwitchView PC switch supports up to four PS/2 computers and is ideal for desktop applications
- SwitchView DVI switch supports high-end applications with 1600 x 1200 video resolution on DVI monitors and flat panels
- SwitchView Multimedia switch provides independent switching of KVM and USB hub ports between USB or PS/2-based computers
- SwitchView KVM switches are backed by Avocent 2 year warranty and technical support
