

**A new, safer way to mouse.**

Ergonomically designed to fit your hand and take the stress out of mousing. Traditional mouse designs force you to grip the mouse between your thumb and little finger. This strains the more delicate muscles in your hand and wrist. The Whale is designed to relax your hand. This allows the larger, stronger muscles in your arm to handle the stress of repetitive movement.

*"People who used the [Whale] mouse maintained an acceptable wrist angle of less than 15.5° twice as often as with the [Microsoft] Mouse."*

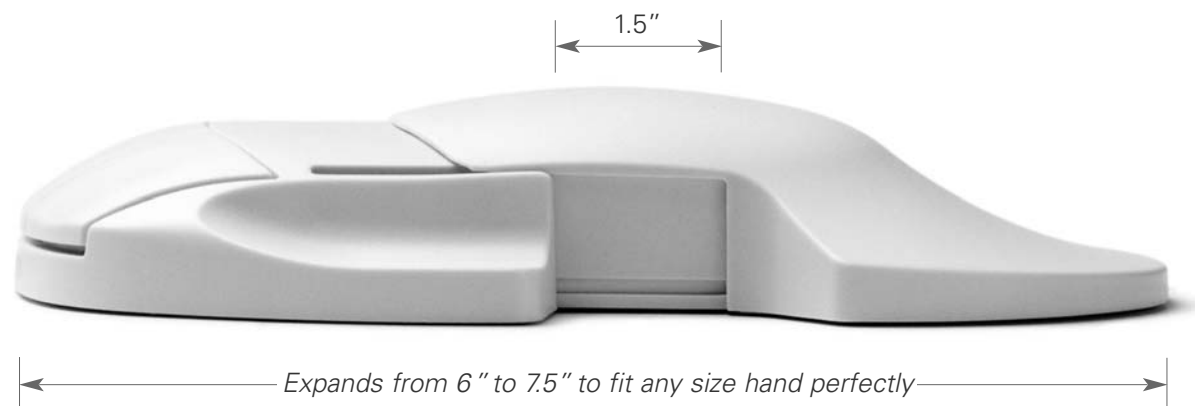

New York Times,  
January 13, 2000

## FEATURES

- Contoured palm rest encourages neutral wrist, hand and finger positions
- Promotes the use of the larger arm muscles by allowing the more delicate muscles to relax
- Easily adjusts up to 1.5" to fit any size hand perfectly
- Symmetrical design allows safe mousing with either hand, left or right
- Programmable middle button
- PC and Mac compatible

## SPECIFICATIONS

- Dynamic Resolution: 400 - 4000dpi
- Input Technology: Opto-mechanical
- Switch: Micro Switch
- Tracking Speed: 500 mm/sec Up
- Current Consumption: 20mA max. @5V
- Switch Mechanical Life: 1,000,000 cycles
- Switch Electrical Life: 30,000 cycles
- Cable Length: 198 cm (78")
- Travel Life: 482 km (300 miles)
- Fits both USB and PS2 connection

**Our Design Philosophy** At Humanscale, we believe the best designs in the world are based on purpose and function. If a design solves a functional problem as simply and elegantly as possible, the resulting form will be honest and timeless.
