

PRODUCT PERSPECTIVE: VIDEO CONVERTERS

VIDEO CONVERTERS

DVI to VGA Converter

The DVI-VGA Converter connects computers with DVI-D connectors to analog VGA monitors or projectors. The converter changes your computer's digital DVI signal to analog graphic signal, so that VGA analog display devices can be connected to your computer with digital output easily and conveniently. Crisp and clear 1280x1024 video resolution is supported.

VGA to DVI Converter

The VGA-DVI Converter connects computers with analog VGA connectors to DVI-D monitors or projectors. The converter changes your computer's analog graphic signal to digital DVI signal, so that digital display devices can be connected to your computer with VGA analog output easily and conveniently. Crisp and clear video resolution up to 1280x1024 is supported. It supports VGA/SVGA and DVI-D monitors, including LCD flat panel monitors. Complies with CE and FCC standards.

TV to VGA & VGA to TV Video Converter

The VGA-CONVERTER MultiVideo System Converter allows the user to view computer video on a TV, or view TV/VCR/DVD video on a VGA computer monitor. This multi-format Video Converter also regenerates sync-pulses and can help stabilize weak video signals from multi-generation videotapes. Useful features include composite or SVHS selectable inputs and picture zooming. Complies with CE and FCC standards.

Quad Screen Splitter

The SPLITMUX-DVI-4 Quad Screen Splitter allows you to simultaneously display and monitor video signals from four different computers and/or video sources on a single screen. Additionally, the SPLITMUX can switch one of the four attached computers to a shared keyboard and mouse for operation. Connect analog and digital devices to the splitter, and display images on a digital or analog monitor. Crisp and clear video resolution up to 1600x1200 is supported. Complies with CE standards.
