

## Desktop Multi-Screen Mount For 10" to 22" LCD Screens

The Articulating Multi-Screen LCD Arms allow arrangement of multiple LCD screens in parabolic placement for simultaneous viewing of up to 4 screens. The adjustable cross arm and pivot mount allow you to put different size screens in various configurations using one or two levels with single or double poles. Ball joint pivot offers individual adjustments of your LCD screens in tilt, swivel and swing motion for maximum viewing capabilities. The attractive die-cast aluminum body and joint provide superior strength, durability and the highest quality for commercial applications.

- Configurations for mounting 2 or 4 LCD screens in one or two levels
- Mounting options for virtually all desktop surfaces (desktop clamp, desktop bolt or free standing desktop base)
- Advanced cable management design
